

Indiana University's Institute for Advanced Study

is pleased to welcome

Philip Novack-Gottshall

2016 Summer Repository Research Fellow

**What do we really know about
Phanerozoic ecological diversification?**

Dr. Phil Novack-Gottshall is conducting research in the Indiana University Paleontology Collection for his Summer Repository Research Fellowship. He is a paleoecologist interested in the long-term diversification of life, the processes that drive it, and the ecological theory that underpins it. He received his M.S. at University of Cincinnati in 1999 and his Ph.D. at Duke University in 2004. He is now on the faculty at Benedictine University in Chicago.

Friday, June 3, 2016

12 p.m.

Geology GY 522

This talk is free and open to the IU community and the general public.
